DETAILED ACTION

1. Claims 1-25 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest the following in combination with the remaining limitations of the claims:

A method for monitoring temperature in at least one location of an electromagnetic coil assembly, the electromagnetic coil assembly having at least one electrical winding, said method comprising passing a light through a non-magnetic optical fiber inserted in a non-magnetic sheath wound and cast with the electrical winding (see claim 1).

An electromagnetic coil assembly kit comprising an electrically conducting electromagnetic winding, a non-magnetic sheath wound and cast therein, and a non-magnetic optic fiber configured for insertion in the sheath (see claim 13).

A measuring apparatus for temperature comprising an electromagnetic coil assembly having an electrically conducting electromagnetic winding, a non-magnetic sheath wound and cast therewith, and a non-magnetic optic fiber inserted in the sheath (see claim 17).

The Examiner has interpreted the phrase "non-magnetic sheath" in the claims above to define a sheath made of a material that does not carry current and is non-metallic, as defined by Applicant on page 4, paragraph 11, and page 10, paragraph 26 of the specification; and on page 8, paragraph 4, and page 9, paragraph 1, of Applicant's arguments in the response filed 8/19/05.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
